Language Constructs For Describing Features: Proceedings Of The FIREworks Workshop

Synopsis

A feature is a small modification or extension of a system which can be seen as having a self-contained functional role, such as Call Forwarding, Automatic Call back and Voice Mail in telephone services, to which users can subscribe. Feature interaction happens when one feature modifies or subverts the operation of another, and this problem has received a great deal of attention from industry and academics, especially in the field of telecommunications, where new services are constantly being developed and deployed. This volume contains refereed papers resulting from the ESPRIT FIREworks working group. The papers focus on the language constructs which have been developed describing features, and advocate a feature-oriented approach to software design including requirements specification languages and verifications logics.

Book Information

File Size: 3310 KB

Print Length: 233 pages

Publisher: Springer; 1 edition (December 6, 2012)

Publication Date: December 6, 2012

Sold by:Â Digital Services LLC

Language: English

ASIN: B000VYLK0O

Text-to-Speech: Enabled

X-Ray: Not Enabled

Word Wise: Not Enabled

Lending: Not Enabled

Enhanced Typesetting: Not Enabled

Best Sellers Rank: #3,574,966 Paid in Kindle Store (See Top 100 Paid in Kindle Store) #81
